

# Robot ACTIVATED! The Rescue Robot Board Game

## Get Set Up!

- Print the game board, preferably on a thicker piece of paper or cardstock to prevent the board from curving.
- Print the Rescue Robot card (cardstock is also best here) and have a grown up help you cut along the lines to make six robot parts. Each player will need a set of robot parts to build one robot.
- Print the game pieces and have a grown up help you cut them out.
- You will also need a regular six-sided die. If you don't have any dice, you can write numbers 1 through 6 on scraps of paper, fold them and put them into a cup to draw from.

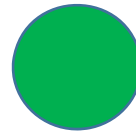

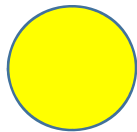

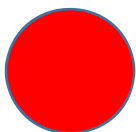

## How to Play:

- Roll the dice – highest roll goes first.
- Move your game piece forward and follow the instructions on the game board.
  - Red spaces help build your robot! Add one or two parts according to the space you land on to build a Rescue Robot.
  - Watch for arrows to send you back or ahead a space.
  - INSTANT RESCUE ROBOT allows you to build your whole robot if you land on it!

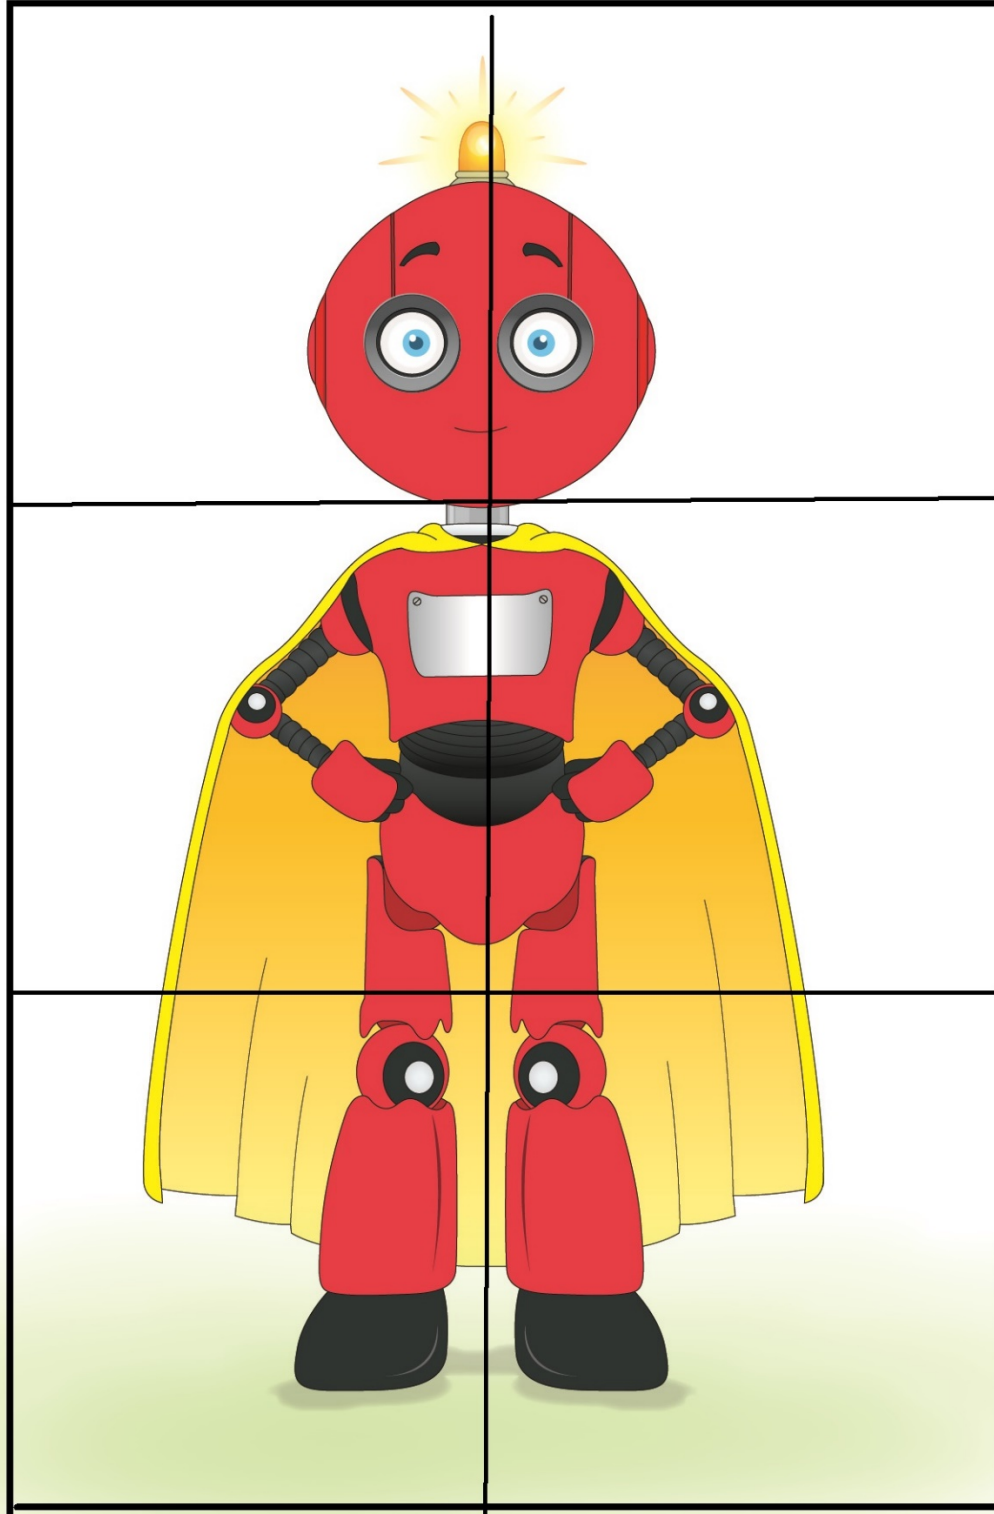

## How to WIN!

- Be the first person to cross the finish line AND have built a complete robot.
- If you reach the finish line but do not have your robot built yet, bump your game piece back to INSTANT ROBOT ACTIVATED, build your robot and get a second chance to win!

## Game Pieces – one for each player!

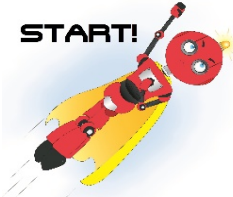

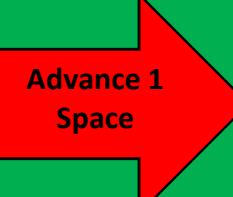

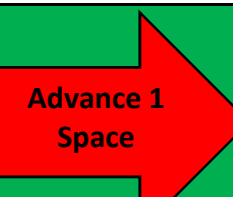

**Rescue Robot Cards – Print one for each player and  
cut along the lines to make six parts.**
